## PROFESSIONAL SUMMARY

Motivated and results-oriented **Computer Science graduate** with strong foundational knowledge in **Java, SQL,** and **Web** Development**.** Completed multiple hands-on projects applying backend logic and database integration. Quick learner with **good communication skills** and a strong desire to contribute to real-world software development.

## SKILLS

- **Programming Languages**: Java
- **Databases:** SQL, MySQL
- **Version Control:** GitHub
- **Core Concepts:** Object-Oriented Programming (OOPs)

## EXPERIENCE

**Advanced Software Engineering Virtual Experience(Job Simulation) |** Walmart Link *June 2024*

- Designed and implemented a custom **Java heap data structure** to optimize shipping operations, significantly enhancing performance.
- Developed **UML class diagrams** to represent a data processor with multiple operational modes, improving system clarity and maintainability.

**Development and Advanced Engineering Virtual Experience (Job Simulation) |** Accenture Link *June 2024*

- Engineered a **Java-based search class** for an interactive website using the **Spring Boot framework**.
- Contributed to **Agile sprint planning**, creating detailed user stories and managingteam workloads for timely project delivery.

## EDUCATION

**Bachelor of Technology (Computer Science and Business Systems)** *Sep 2022 -June 2025*

G. Pulla Reddy Engineering College |CGPA 8/10

## PROJECTS

**Train Reservation System (Java + SQL)** *June 2025 – Aug 2025*

- Developed a console-based **Java application for train ticket booking** and **cancellation.**.
- **Integrated with MySQL** for data persistence related to trains, passengers, and bookings.
- Implemented core features **like booking status, PNR generation,** and **seat availability**.

**Product Recommendation System Link** *Aug 2024 – March 2025*

- Developed a **machine learning-based recommendation engine** using the **Apriori algorithm**.
- Enhanced customer engagement by **20%** through personalized product recommendations.
- Implemented **efficient association rule mining**, ensuring **scalability for large datasets**.

## ACHIEVEMENTS

- **Certified in Java** – Nptel Link
- **Certified in Fundamentals of AI -** Helsinki University Link
- **Certified in Demystifying AI/ML/DL -** aws Link
- **Power BI Workshop** – Office Master Link

## PERSONALITY TRAITS

- **Problem-Solving:** Passionate about solving complex challenges using algorithms & data structures.
- **Teamwork:** Highly collaborative, experienced in **Agile, Scrum, and cross-functional teams.**
- **Adaptability:** Quick learner, stays updated with the latest **technology trends and best practices.**
- **Leadership:** Took initiative during team projects and led multiple academic and virtual assignments**.**
- **Communication:** Strong verbal and written communication skills, showcased in Agile standups and sprint planning.
- **Critical Thinking:** Applied logical reasoning in designing efficient Java-based backend solutions.
